

ESPI current report

Number: 41/2025
 Date of preparation: October 15, 2025
 Company: Genomtec SA based in Wrocław

Title	Receipt of a decision from the European Patent Office to grant a European patent.
-------	---

Legal basis: Article 17 paragraph 1 of MAR - confidential information.

Content of the Report: The Management Board of Genomtec S.A. with its registered office in Wrocław (hereinafter referred to as the "Issuer", "Company") hereby announces that on October 15, 2025, it received information about the granting of a European patent for the invention entitled: "A method of detecting genetic material in a biological sample and a device for its implementation".

The invention includes key technical solutions related to a proprietary non-contact heating and temperature detection system developed for, among others, the Genomtec ID POCT platform.

The period of protection for the invention in question was granted by the European Patent Office subject to the condition of timely payment of official fees for subsequent years of protection.

The Issuer announces that this is the seventeenth patent granted to the Company. The Issuer has over thirty patent applications pending worldwide.

In the opinion of the Management Board, a high level of intellectual property protection will also provide the Company with an appropriate negotiating position before signing commercial agreements with selected partners regarding the implementation of the commercialization strategy.

Patent proceedings are aimed at securing key interests and are part of the Issuer's development strategy, which includes building a portfolio of intellectual property rights.

Signatures of persons representing the Company:

Michał Wachowski - Member of the Management Board
